GreenStreme[®]

ORGANIC LIQUID FISH FERTILIZER

GreenStreme[®] is an organic fish hydrolysate prepared from fresh Rainbow Trout that is harvested from the Great Lakes. The patented manufacturing process involves the immediate processing of rainbow trout by-products into high quality and low odor liquid concentrates. The unique process maintains the highest concentration of mineral elements including calcium from bone. The finished product is screened before packaging to allow for convenience of application through most hose end and hydroponic applicators.

GreenStreme®

Organic Fish Hydrolysate

Prepared from fresh Rainbow Trout that is harvested from the Great Lakes, the patented manufacturing process involves the immediate processing of Rainbow Trout by-products into high quality liquid concentrates.

Root and Shoot Strength and Vitality

The unique process maintains the highest concentration and quality of organic matter to boost overall soil health. The natural elements, including the valuable micronutrients and calcium from bone, are preserved in their purest form to promote root and shoot strength and vitality.

High Performance with Low Odor

The finished product is prepared immediately after fish processing to guarantee freshness and the industry's lowest odor. GreenStreme® is filtered twice before packaging to allow for convenience of application using hydroponic systems or most hose end applicators.
